APPOINTMENTS

PATIENT INFORMATION

The tests carried out in the Macarthur Vascular Diagnostics laboratory are performed to assess the flow of the blood through the arteries and veins of the body. The tests are safe and non-invasive, which means there is no exposure to radiation, injections or side effects.

FASTING INSTRUCTIONS (Abdominal tests)

Please do not eat anything after 9pm the night before your appointment unless otherwise advised. Be sure to avoid fatty foods, gassy drinks and all dairy products for 24 hours prior to your appointment. Please refrain from smoking or chewing gum on the morning of your appointment. You may take your medications on the morning of your appointment (as per normal) with a small amount of water only.

For strictly renal tests: Please drink 1-2 glasses of water on the morning of your appointment. You do not need to hold this water.

DIABETIC PATIENTS

If you are a diabetic on insulin, you can have a light breakfast at 6am on the morning of your appointment. You are to have two slices of toast with either Vegemite or jam and black tea or coffee. You must then fast until your abdominal test is completed.

If you are in doubt regarding fasting preparation, please do not hesitate to ring us and we will advise you.

If you are unable to attend your appointment, please contact us at least 24 hours prior to your appointment as a cancellation fee may be charged.
